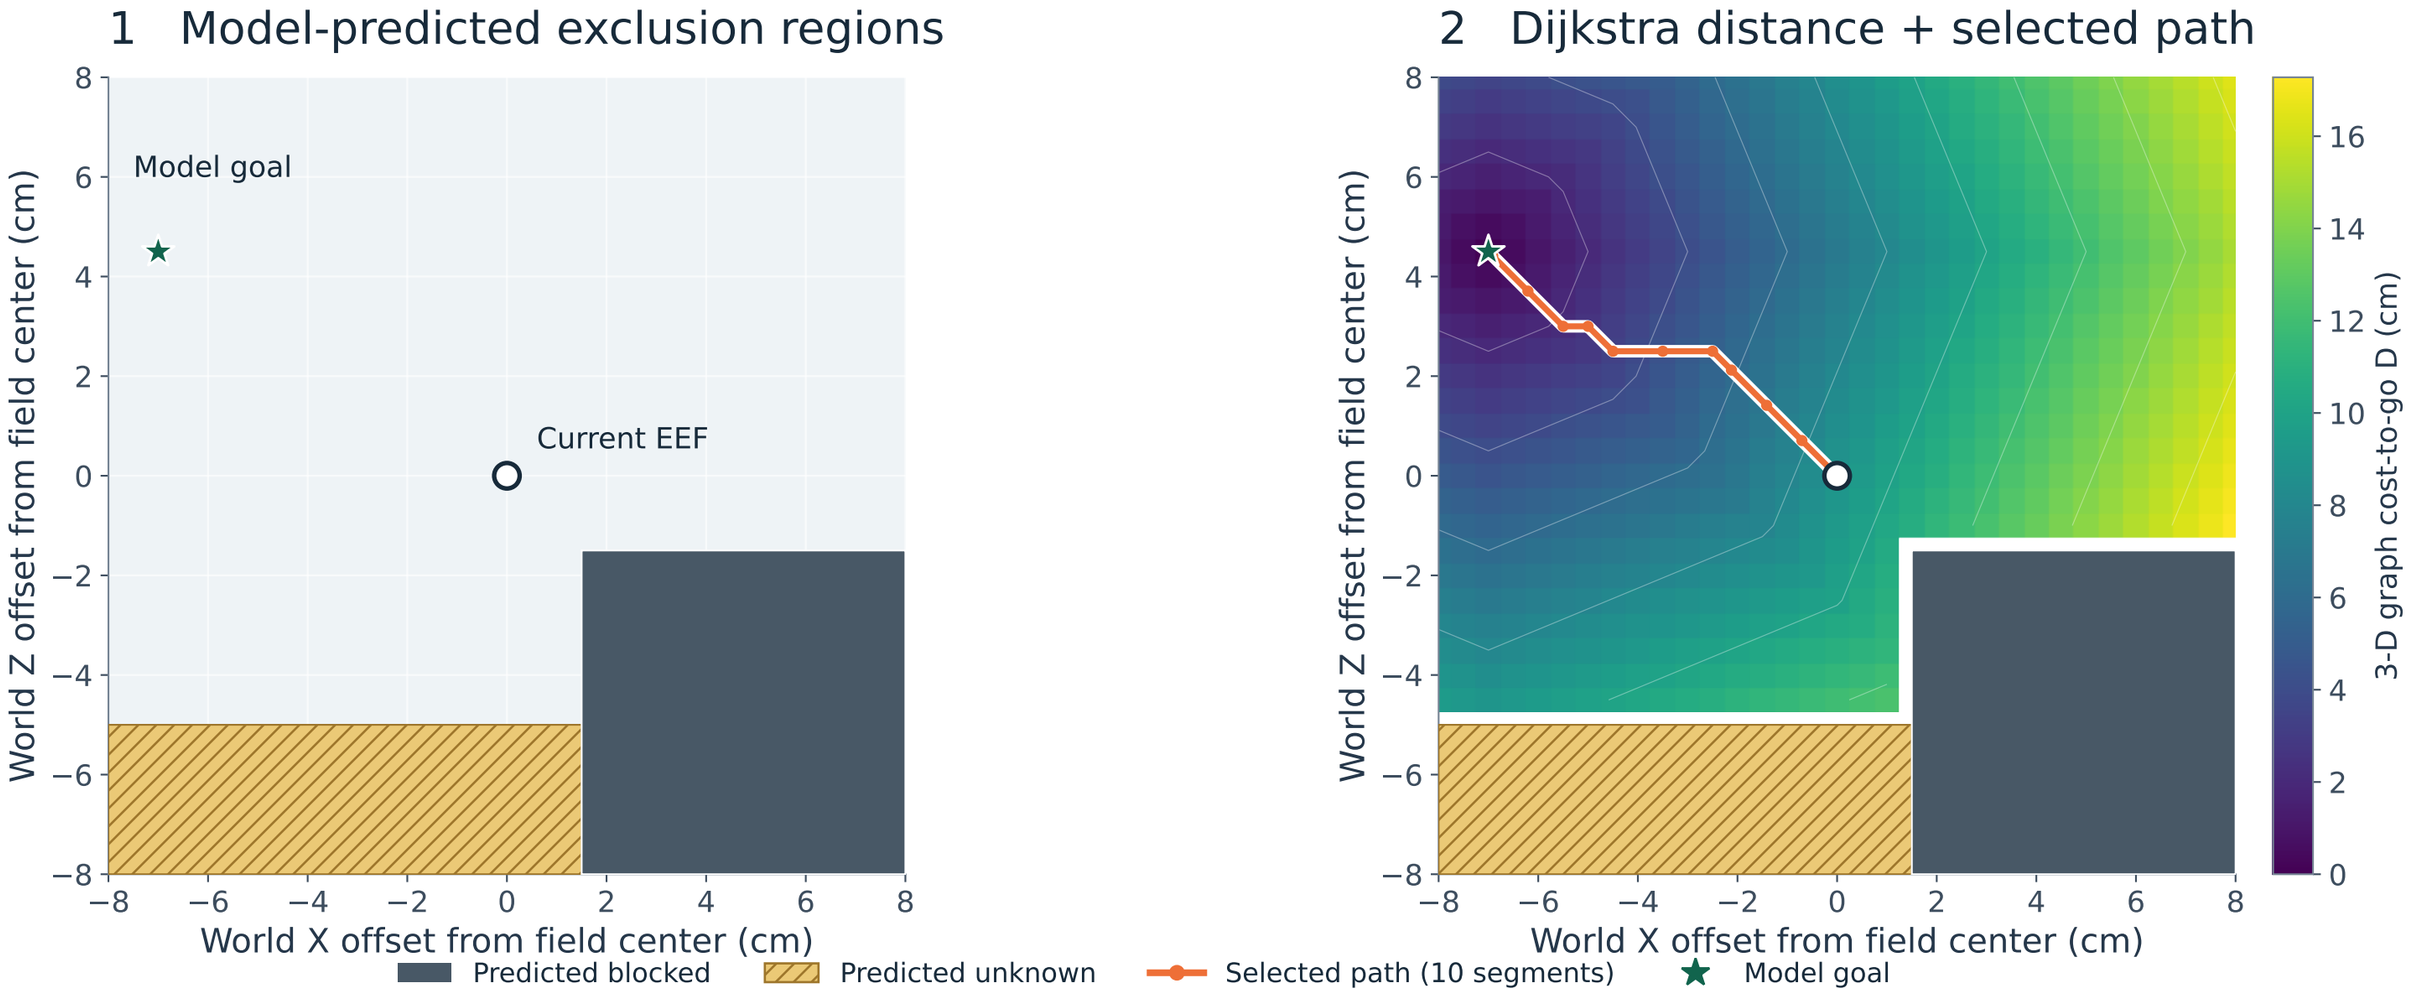
A real model-specified local map becomes a 3-D cost-to-go field

Recorded Hybrid decision at action 201 | 33³ grid | 5 mm spacing | 16 cm span



Exact XZ slice at world Y = 0.20656 m. The selected path lies in this plane; D was solved in 3-D.

Here ρ = 1 (no repulsors): D(start) = 8.864 cm. Masks are model estimates, not measured object geometry.
